

Introduction

1.1 Purpose

MyCar is an android application that help customer rent vehicle from a dealership. This document is a document of requirement and the process of developing this android application. The document is to keep tack and help during the developing.

1.2 Scope

MyCar is an application for customer to rent vehicle from dealerships. MyCar will allow customers to search and select the type of vehicle they want to rent directly from dealership. They can choose the amount of time (days) that they want to rent the car for. Customer can make reservation for the vehicle they want to rent for the date they want to rent on. MyCar is intended to make it easier for customer to rent car.

With MyCar, dealers can add their vehicle to be rented to customer. They can set the price, availability and details (color, features, history...) of the vehicle. The dealers can also cancel the reservation of customers and send a message to the customer about the cancel.
